DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/30/07 has been entered. Claims 32, 35, 39-41, 47, 50 and 51 are pending in the application.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

3. Claims 47 and 51 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoshino et al (US. 5,619,224 hereinafter Hoshino).

As to claim 47, Hoshino discloses an image display apparatus (Fig. 1), comprising: a plurality of display devices wired in a matrix (matrix panel 1) through a plurality of scanning signal wirings (row electrodes 2) and a plurality of modulated signal wirings (column electrodes 3); and a driving circuit (5, 6, 8, 12) configured to apply an individual pulse signal (Fig. 4) as a modulated signal having a modulated pulse width to each of the plurality of modulated signal wirings (col. 6, lines 59-62 for example). Fig. 4 of Hoshino discloses the pulse signal has a first portion (P1) at a leading edge of the pulse signal, a maximum level portion (V2) of the pulse

signal and a second portion (P2) at a trailing edge of the pulse signal, wherein in the first portion (P1), a signal level of the pulse signal rises up to a first predetermined level (level between V4 & V5) which is lower than a maximum level of the maximum level portion (V2) and is maintained at the first predetermined level during a first predetermined time period, and wherein in the second portion (P2), a signal level of the pulse signal falls down to a second predetermined level (level between V4 & V5) which is lower than the maximum level of the pulse signal maximum level portion (V2) and is maintained at the second predetermined level during a second predetermined time period.

As to claim 51, Fig. 4 of Hoshino discloses the first predetermined level is equal to the second predetermined level (level between V4 & V5).

Allowable Subject Matter

4. Claims 32, 35, 39-41, 50 are allowed.

Response to Arguments

5. Applicant's arguments with respect to claims 47 and 51 have been considered but are moot in view of the new ground(s) of rejection.
